

SonarQube Analysis Report

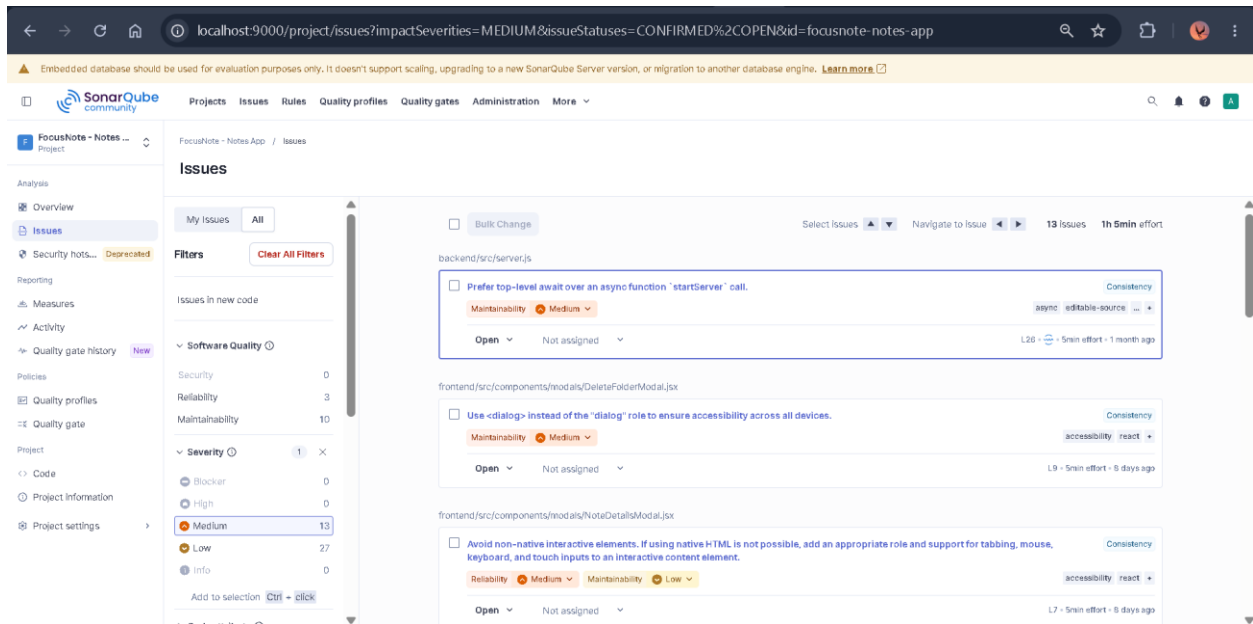

1. Project Overview:

Shows 82.7% coverage, Security A, Reliability C, Maintainability A and 1.9% duplications.

2. All Issues:

Shows the total open issues and their breakdown and captures the list showing the SonarQube findings.

3. Reliability:

The screenshot shows the SonarQube web interface for a project named 'FocusNote - Notes App'. The URL in the browser is `localhost:9000/project/issues?impactSeverities=MEDIUM&impactSoftwareQualities=RELIABILITY&issueStatuses=CONFIRMED%2COPEN&id=...`. The left sidebar contains a navigation menu with sections: Analysis (Overview, Issues, Security hotspots), Reporting (Measures, Activity, Quality gate history), Policies (Quality profiles, Quality gate), and Project (Code, Project information, Project settings). The 'Issues' section is active. The main panel displays a list of issues filtered by 'Software Quality' (Reliability) and 'Severity' (Medium). The issues are listed with their file paths, descriptions, and various metrics.

File Path	Description	Reliability	Maintainability	Open	Not assigned	Effort
frontend/src/components/modals/NoteDetailsModal.jsx	Avoid non-native interactive elements. If using native HTML is not possible, add an appropriate role and support for tabbing, mouse, keyboard, and touch inputs to an interactive content element.	Medium	Low	Open	Not assigned	L7 - 5min effort - 8 days ago
frontend/src/components/modals/ProfileModal.jsx	Avoid non-native interactive elements. If using native HTML is not possible, add an appropriate role and support for tabbing, mouse, keyboard, and touch inputs to an interactive content element.	Medium	Low	Open	Not assigned	L5 - 5min effort - 4 days ago
frontend/src/components/ui/NoteCard.jsx	Non-interactive elements should not be assigned interactive roles.	Medium	Low	Open	Not assigned	L21 - 5min effort - 8 days ago

The screenshot shows the SonarQube web interface for the same project, but with the URL changed to filter by 'impactSeverities=LOW'. The left sidebar is identical to the previous screenshot. The main panel displays a list of issues filtered by 'Software Quality' (Reliability) and 'Severity' (Low). The issues are listed with their file paths, descriptions, and various metrics.

File Path	Description	Reliability	Maintainability	Open	Not assigned	Effort
frontend/src/components/modals/NoteDetailsModal.jsx	Non-interactive elements should not be assigned mouse or keyboard event listeners.	Low	Medium	Open	Not assigned	L10 - 5min effort - 8 days ago
frontend/src/components/modals/ProfileModal.jsx	Visible, non-interactive elements with click handlers must have at least one keyboard listener.	Low	Medium	Open	Not assigned	L10 - 5min effort - 8 days ago
frontend/src/components/modals/ProfileModal.jsx	Non-interactive elements should not be assigned mouse or keyboard event listeners.	Low	Medium	Open	Not assigned	L14 - 5min effort - 4 days ago
frontend/src/components/modals/ProfileModal.jsx	Visible, non-interactive elements with click handlers must have at least one keyboard listener.	Low	Medium	Open	Not assigned	L14 - 5min effort - 4 days ago

4. Maintainability:

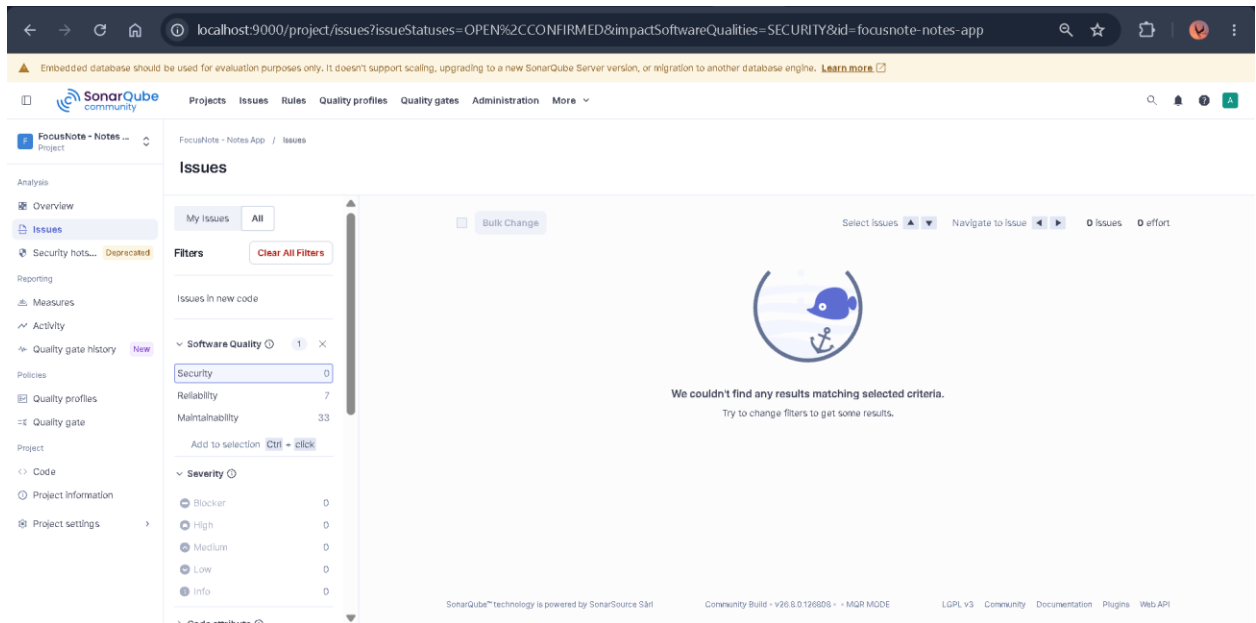

The screenshot shows the SonarQube interface for a project named 'FocusNote - Notes App'. The left sidebar contains navigation links for Overview, Issues, Security hotspots, Reporting, Measures, Activity, Quality gate history, Policies, Quality profiles, Quality gate, Project, Code, Project information, and Project settings. The main panel displays a list of 10 issues with a total effort of 50 minutes. The issues are filtered by 'Software Quality' (1) and 'Severity' (1). The issues are:

- Issue 1: `backend/src/server.js` - `Prefer top-level await over an async function 'startServer' call.` - Maintainability: Medium - Consistency: async - L26 - 5min effort - 1 month ago
- Issue 2: `frontend/src/components/modals/DeleteFolderModal.jsx` - `Use <dialog> instead of the 'dialog' role to ensure accessibility across all devices.` - Maintainability: Medium - Consistency: accessibility - L9 - 5min effort - 8 days ago
- Issue 3: `frontend/src/components/modals/NoteDetailsModal.jsx` - `Non-interactive elements should not be assigned mouse or keyboard event listeners.` - Maintainability: Medium - Consistency: accessibility - L16 - 5min effort - 8 days ago

The screenshot shows the SonarQube interface for the same project, 'FocusNote - Notes App'. The left sidebar is the same. The main panel displays a list of 23 issues with a total effort of 3h 33min. The issues are filtered by 'Software Quality' (1) and 'Severity' (1). The issues are:

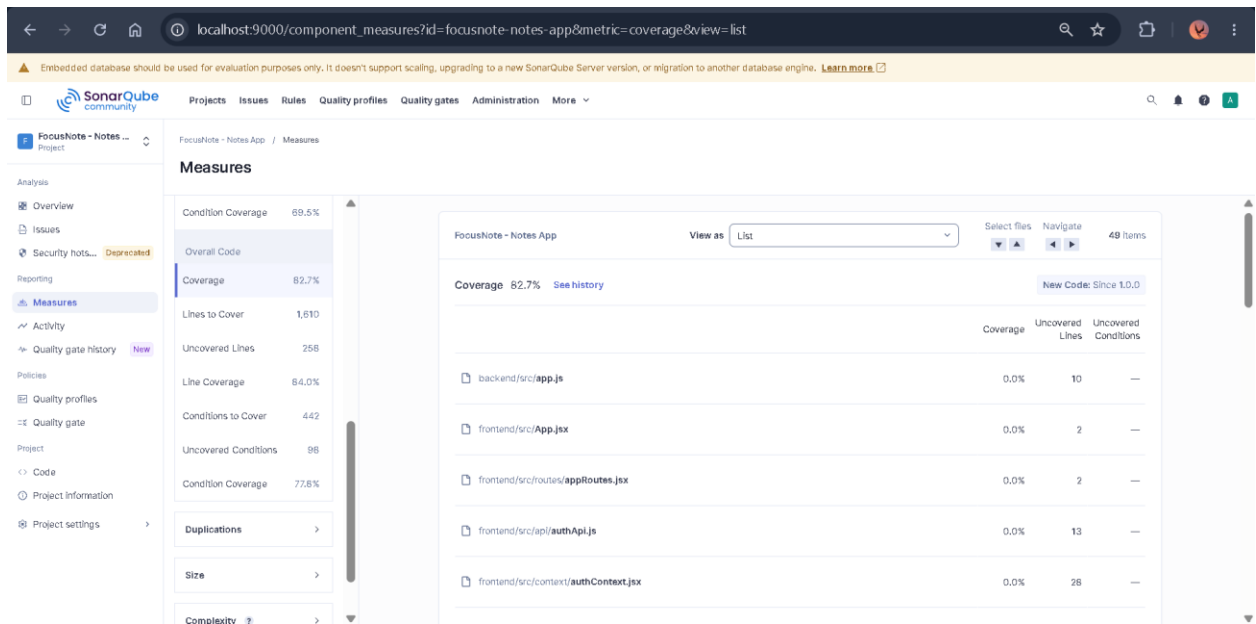

- Issue 4: `backend/src/middleware/authMiddleware.js` - `Prefer using an optional chain expression instead, as it's more concise and easier to read.` - Maintainability: Low - Intentionality: type-dependent - L7 - 5min effort - 1 month ago
- Issue 5: `backend/src/middleware/authMiddleware.js` - `Handle this exception or don't catch it at all.` - Maintainability: Low - Intentionality: error-handling - L21 - 1h effort - 1 month ago
- Issue 6: `backend/src/routes/authRoutes.js` - `E:\Abdullah Ejaz\10pearls\cohort-8-mern-15364-abdullah\backend\src\controllers\authController.js' imported multiple times.` - Maintainability: Low - Consistency: es2015 - L2 - 1min effort - 1 month ago
- Issue 7: `backend/src/routes/authRoutes.js` - `E:\Abdullah Ejaz\10pearls\cohort-8-mern-15364-abdullah\backend\src\controllers\authController.js' imported multiple times.` - Maintainability: Low - Consistency: - L2 - 1min effort - 1 month ago

5. Security:

The screenshot shows the SonarQube web interface for the 'FocusNote - Notes App' project. The 'Issues' tab is selected in the left sidebar. The main content area displays a message: 'We couldn't find any results matching selected criteria. Try to change filters to get some results.' The filters on the left include 'Software Quality' (Security: 0, Reliability: 7, Maintainability: 33) and 'Severity' (Blocker: 0, High: 0, Medium: 0, Low: 0, Info: 0). The top navigation bar includes links for Projects, Issues, Rules, Quality profiles, Quality gates, Administration, and More.

6. Coverage:

The screenshot shows the SonarQube web interface for the 'FocusNote - Notes App' project. The 'Measures' tab is selected in the left sidebar. The main content area displays a table of coverage metrics for the project. The table has columns for Coverage, Uncovered Lines, and Uncovered Conditions. The data is as follows:

File	Coverage	Uncovered Lines	Uncovered Conditions
backend/src/app.js	0.0%	10	—
frontend/src/App.jsx	0.0%	2	—
frontend/src/routes/appRoutes.jsx	0.0%	2	—
frontend/src/api/authApi.js	0.0%	13	—
frontend/src/context/authContext.jsx	0.0%	28	—

The top navigation bar includes links for Projects, Issues, Rules, Quality profiles, Quality gates, Administration, and More. The left sidebar includes links for Overview, Issues, Security hotspots, Measures, Activity, Quality gate history, Policies, Quality profiles, Quality gate, Project, Code, Project Information, and Project settings.

7. Quality Gate:

The screenshot shows the SonarQube web interface for configuring a quality gate. The browser address bar shows `localhost:9000/quality_gates/show/Sonar%20way`. A warning banner at the top states: "Embedded database should be used for evaluation purposes only. It doesn't support scaling, upgrading to a new SonarQube Server version, or migration to another database engine. [Learn more](#)".

The interface includes a sidebar with navigation links: **Quality gates** (selected), **Create**, **Sonar way** (selected), **Default**, and **Built-in**. The main content area is titled **Sonar way** with tabs for **Default** and **Built-in**. A **Copy** button is in the top right.

Below the title, there is a checkbox: ☒ This quality gate reflects **Sonar recommended practices**. Below this is a section titled **Conditions** with a sub-section **Conditions on New Code**. This section contains four conditions:

- New code has 0 Issues
- All new security hotspots are reviewed
- New code has sufficient test coverage (Coverage is greater than or equal to 80.0%)
- New code has limited duplications (Duplicated Lines (%) is less than or equal to 3.0%)

Below the conditions is a **Projects** section with the text: "Every project not specifically associated to a quality gate will be associated to this one by default."

The footer contains the following text: "SonarQube™ technology is powered by SonarSource Sdkt", "Community Build - v26.8.0.12680S - MGR MODE", and "LGPL V3 Community Documentation Plugins Web API".

The screenshot shows the SonarQube web interface for the **Quality gate history** of the **FocusNote - Notes App** project. The browser address bar shows `localhost:9000/quality_gate_history?id=focusnote-notes-app`. A warning banner at the top is identical to the previous screenshot.

The interface includes a sidebar with navigation links: **FocusNote - Notes App** (selected), **Project**, **Analysis**, **Overview**, **Issues**, **Security hotspots** (Deprecated), **Reporting**, **Measures**, **Activity**, **Quality gate history** (selected), **Policies**, **Quality profiles**, **Quality gate**, **Project**, **Code**, **Project information**, and **Project settings**.

The main content area is titled **Quality gate history** with the subtitle: "This page helps you identify releases made while quality gate was failing." Below this is a section titled "Each version released on the main branch is marked **safe** when its quality gate passed at release time, or **risky** when it failed."

The history is displayed with filters: **All time** (selected), **30 days**, **6 months**, and **1 year**. The **Last released** is **1.0** on Sep 2, 2026.

The history shows two categories of releases:

- Safe releases**: 100% (3 of 3 releases)
- Risky releases**: 0% (0 of 3 releases)

The history is visualized as a timeline with three releases:

- 0.0.0** Sep 1: Gate passed (safe)
- 1.0.0** Sep 2: Gate passed (safe)
- 1.0** Sep 2: Gate passed (safe)

The footer contains the following text: "SonarQube™ technology is powered by SonarSource Sdkt", "Community Build - v26.8.0.12680S - MGR MODE", and "LGPL V3 Community Documentation Plugins Web API".
