

SonarQube Analysis Report

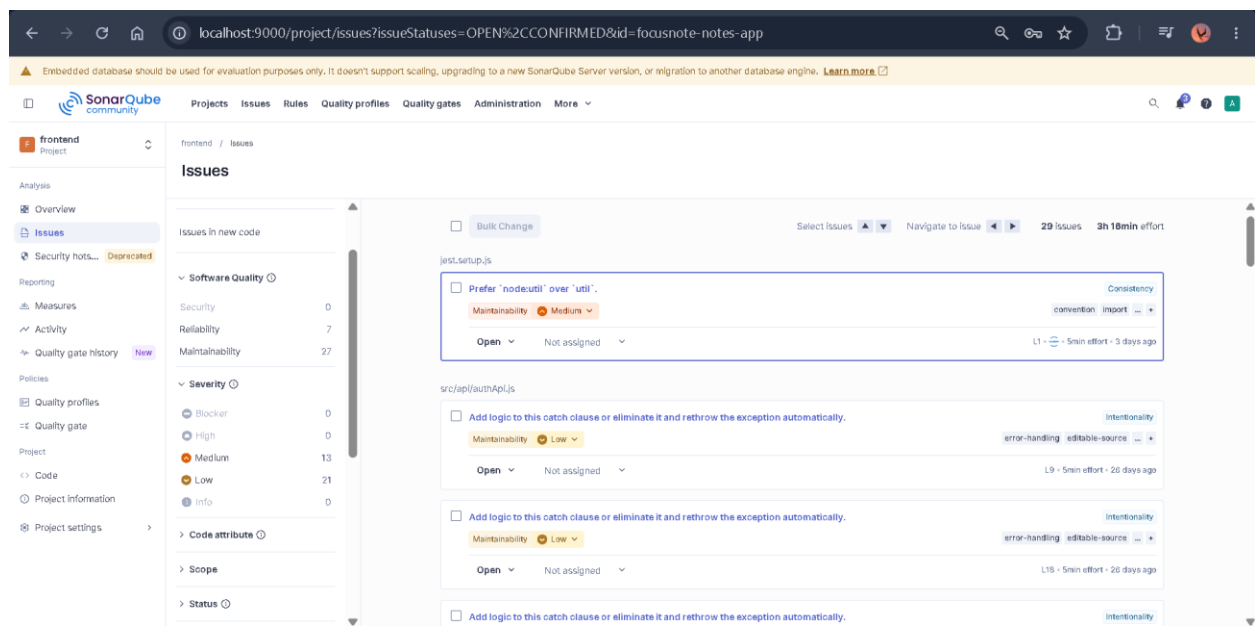

1. Project Overview :

Shows 62.8% coverage, Security A, Reliability C, Maintainability A and 2.9% duplications.

2. All Issues:

Shows the total open issues and their breakdown and captures the list showing the SonarQube findings.

3. Reliability:

The screenshot shows the SonarQube web interface for a project named 'frontend'. The left sidebar contains navigation links for Analysis, Overview, Issues, Security hotspots, Reporting, Measures, Activity, Quality gate history, Policies, Quality profiles, Quality gate, Project, Code, Project Information, and Project settings. The main panel displays 'Issues' for the 'frontend' project. A filter is applied: 'Software Quality' (1) and 'Reliability' (7). The 'Severity' filter is set to 'Low' (4). The 'Code attribute' is 'Scope'. The 'Issues in new code' section shows 7 issues. The 'Bulk Change' button is visible. The 'Select Issues' dropdown is set to 'All'. The 'Navigate to Issue' dropdown is set to 'L7'. The '7 Issues' and '35min effort' are displayed. The issues are listed in a table with columns for 'Open', 'Not assigned', 'Consistency', 'accessibility', and 'react'. The issues are:

- ☐ Avoid non-native interactive elements. If using native HTML is not possible, add an appropriate role and support for tabbing, mouse, keyboard, and touch inputs to an interactive content element. Consistency. Reliability: Low, Maintainability: Low. L7 - 5min effort - 7 days ago.
- ☐ Non-interactive elements should not be assigned mouse or keyboard event listeners. Consistency. Reliability: Low, Maintainability: Medium. L16 - 5min effort - 7 days ago.
- ☐ Visible, non-interactive elements with click handlers must have at least one keyboard listener. Intentionality. Reliability: Low. L16 - 5min effort - 7 days ago.

The screenshot shows the SonarQube web interface for a project named 'frontend'. The left sidebar contains navigation links for Analysis, Overview, Issues, Security hotspots, Reporting, Measures, Activity, Quality gate history, Policies, Quality profiles, Quality gate, Project, Code, Project Information, and Project settings. The main panel displays 'Issues' for the 'frontend' project. A filter is applied: 'Software Quality' (1) and 'Reliability' (4). The 'Severity' filter is set to 'Low' (4). The 'Code attribute' is 'Scope'. The 'Issues in new code' section shows 4 issues. The 'Bulk Change' button is visible. The 'Select Issues' dropdown is set to 'All'. The 'Navigate to Issue' dropdown is set to 'L16'. The '4 Issues' and '35min effort' are displayed. The issues are listed in a table with columns for 'Open', 'Not assigned', 'Consistency', 'accessibility', and 'react'. The issues are:

- ☐ Non-interactive elements should not be assigned mouse or keyboard event listeners. Consistency. Reliability: Low, Maintainability: Medium. L16 - 5min effort - 7 days ago.
- ☐ Visible, non-interactive elements with click handlers must have at least one keyboard listener. Intentionality. Reliability: Low. L16 - 5min effort - 7 days ago.
- ☐ Non-interactive elements should not be assigned mouse or keyboard event listeners. Consistency. Reliability: Low, Maintainability: Medium. L14 - 5min effort - 3 days ago.
- ☐ Visible, non-interactive elements with click handlers must have at least one keyboard listener. Intentionality. Reliability: Low. L14 - 5min effort - 3 days ago.

4. Maintainability:

The screenshot shows the SonarQube interface for a project named 'frontend'. The left sidebar contains navigation links for Analysis, Overview, Issues, Security hotspots, Reporting, Measures, Activity, Quality gate history, Policies, Quality profiles, Quality gate, Project, Code, Project Information, and Project settings. The main panel displays 'Issues' with a filter for 'Software Quality' and 'Maintainability' set to 10. The 'Severity' filter is set to 'Medium'. The 'Code attribute' is set to 'Info'. The 'Scope' is set to 'Project'. The main panel shows 10 issues with a total effort of 50min. The issues are listed in a table with columns for file path, description, severity, maintainability, and effort. The issues are:

- jest.setup.js: Prefer 'node:util' over 'util'. (Consistency, Medium Maintainability, 5min effort)
- src/components/nodes/DeleteFolderModal.jsx: Use <dialog> instead of the 'dialog' role to ensure accessibility across all devices. (Consistency, Medium Maintainability, 5min effort)
- src/components/nodes/NoteDetailsModal.jsx: Non-interactive elements should not be assigned mouse or keyboard event listeners. (Consistency, Medium Maintainability, 5min effort)

The screenshot shows the SonarQube interface for a project named 'frontend'. The left sidebar contains navigation links for Analysis, Overview, Issues, Security hotspots, Reporting, Measures, Activity, Quality gate history, Policies, Quality profiles, Quality gate, Project, Code, Project Information, and Project settings. The main panel displays 'Issues' with a filter for 'Software Quality' and 'Maintainability' set to 17. The 'Severity' filter is set to 'Low'. The 'Code attribute' is set to 'Info'. The 'Scope' is set to 'Project'. The main panel shows 17 issues with a total effort of 2h 18min. The issues are listed in a table with columns for file path, description, severity, maintainability, and effort. The issues are:

- src/api/authApi.js: Add logic to this catch clause or eliminate it and rethrow the exception automatically. (Intentionality, Low Maintainability, 5min effort)
- src/api/authApi.js: Add logic to this catch clause or eliminate it and rethrow the exception automatically. (Intentionality, Low Maintainability, 5min effort)
- src/api/authApi.js: Add logic to this catch clause or eliminate it and rethrow the exception automatically. (Intentionality, Low Maintainability, 5min effort)
- src/api/foldersApi.js: Add logic to this catch clause or eliminate it and rethrow the exception automatically. (Intentionality, Low Maintainability, 5min effort)

5. Security:

The screenshot shows the SonarQube web interface for the 'frontend' project. The 'Issues' tab is active, and the filters are set to 'Security Quality'. The main area displays a message: 'We couldn't find any results matching selected criteria. Try to change filters to get some results.' The left sidebar shows the project structure, and the top navigation bar includes links to Projects, Issues, Rules, Quality profiles, Quality gates, Administration, and More.

localhost:9000/project/issues?issueStatuses=OPEN%2CCONFIRMED&impactSoftwareQualities=SECURITY&id=focusnote-notes-a...

Embedded database should be used for evaluation purposes only. It doesn't support scaling, upgrading to a new SonarQube Server version, or migration to another database engine. [Learn more](#)

6. Coverage:

The screenshot shows the SonarQube web interface for the 'frontend' project. The 'Measures' tab is active, and the view is set to 'List'. The main area displays a table of coverage metrics for various files. The left sidebar shows the project structure, and the top navigation bar includes links to Projects, Issues, Rules, Quality profiles, Quality gates, Administration, and More.

7. Quality Gate:

The screenshot shows the SonarQube interface for configuring a quality gate. The browser address bar shows `localhost:9000/quality_gates/show/Sonar%20way`. The page title is "Quality gates" with a "Create" button. On the left, a sidebar lists "Quality gates" with "Sonar way" selected. The main content area is titled "Sonar way" and includes a "Copy" button. A note states: "This quality gate reflects Sonar recommended practices." Under the "Conditions" section, titled "Conditions on New Code", there are four conditions: "New code has 0 Issues", "All new security hotspots are reviewed", "New code has sufficient test coverage" (with a sub-condition "Coverage is greater than or equal to 80.0%"), and "New code has limited duplications" (with a sub-condition "Duplicated Lines (%) is less than or equal to 3.0%"). The "Projects" section states: "Every project not specifically associated to a quality gate will be associated to this one by default." The footer includes "SonarQube™ technology is powered by SonarSource S&P", "Community Build - v26.8.0.126808 - MGR MODE", and links for "LGPL v3", "Community", "Documentation", "Plugins", and "Web API".

The screenshot shows the SonarQube interface for the "Quality gate history" of the "frontend" project. The browser address bar shows `localhost:9000/quality_gate_history?id=focusnote-notes-app`. The page title is "Quality gate history" with a subtitle "This page helps you identify releases made while quality gate was failing." The main content area shows a timeline of releases. A note states: "Each version released on the main branch is marked **safe** when its quality gate passed at release time, or **risky** when it failed." The timeline shows three releases: "1.0.0 Aug 31", "1.0 Sep 1", and "0.0.0 Sep 1". The first two releases are marked "safe" (green checkmark) and the third is marked "risky" (red X). The "Safe releases" section shows "100%" (3 of 3 releases) and the "Risky releases" section shows "0%" (0 of 3 releases). The footer includes "SonarQube™ technology is powered by SonarSource S&P", "Community Build - v26.8.0.126808 - MGR MODE", and links for "LGPL v3", "Community", "Documentation", "Plugins", and "Web API".
